

25 Years of Growth and Reliability

Building on the foundation started in 1928, when Grenada's first electricity generation plant was commissioned, the 1994 Grenlec Public-Private Partnership has recorded significant growth.

With the investment of \$349 Million in staff training, infrastructural upgrades, ongoing maintenance and new technologies, Grenlec has more than doubled its generating capacity to keep up with demand and meet the needs of our customers.

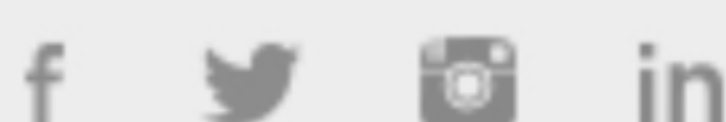

Performance Improvements 1994-2018:

 + 138% Keeping up with Demand 13.96 MW to 33.21 MW peak demand	 +114% Increasing Generation Capacity 23.75 MW to 51 MW	 99.93% Maintaining Reliability Percentage of time electricity available to customers. Average System Availability Index (ASAI) 2018.
